Contractor: Lash Construction, Inc.

Estimated Project Completion: August 29, 2008

Phone: (805) 963-3553

Project Description:

This Redevelopment Agency funded project consists of the removal and replacement of approximately 5,000 linear feet of existing sidewalk, access ramps, curb and gutter, driveway, landscaping improvements, concrete benches, trash receptacles, and decorative ironwork on the light poles on East Cabrillo Boulevard, between approximately just east of the State Street Bridge and Milpas Street. The sidewalk associated with the bridge will be completed when the bridge is constructed. The project is part of the City's Cabrillo Beachway Improvement Plan and will improve safety, access, and beautify the historic area.

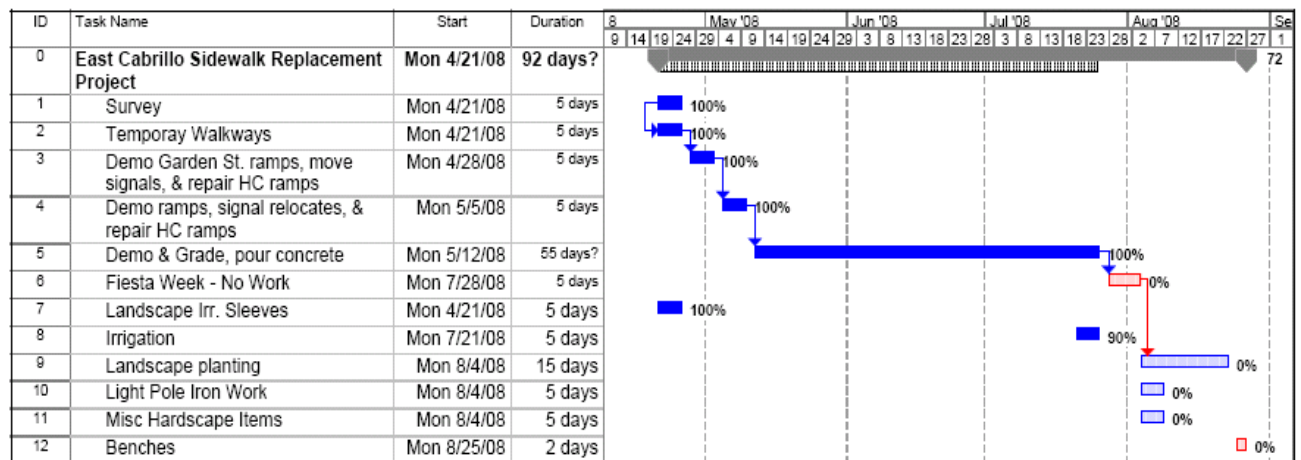

Project Progress:

During the month of July 2008, Lash demolished and replaced approximately 900 feet of sidewalk and parkway between the Calle Cesar Chavez intersection and Puerto Vallarta. This completed the concrete work for the project. Lash drilled and installed the remaining copper artisan tags to the end of the Crafts section – number 351. The entire sidewalk is currently clean and operational. There will be no work during the week of Fiesta – July 30 to August 3, 2008.

Proposed Work (August 4th):

Azalea will begin installing the landscape plantings. They will continue to work on the irrigation. Lash will continue replacing the pull boxes in the grass behind the sidewalk.

The current schedule for this work is as follows:
